

Environmental Policy Statement – Kelvin Power

At Kelvin Power we are committed to the prevention of pollution and reducing our effect on the environment during all of our business activities. In order to strive towards meeting this commitment we will:

- * meet all necessary legislative and regulatory requirements which relate to our business.
- * keep relevant interested parties informed of environmental issues and, in particular, those which are of direct relevance to our business,
- * continue to raise the awareness of all our employees, the effect of their actions on, and their responsibility to the environment; by communication, discussion and training,
- * To minimise any adverse environmental impacts of our operations, and disposal of assets, and operate suitable waste minimisation and recycling schemes, and use conference calls where possible
- * manage our building in an environmentally sensitive manner,
- * make use of, wherever practicable and cost viable, best environmental practice when planning and developing new and existing business activities,
- * operate a thoughtful purchasing policy by selecting wherever practical, materials and services which are less damaging to the environment,
- * set environmental objectives and targets based on continual improvement, monitor results and review on a regular basis
- * establish and maintain an environmental management system which continually reduces waste, effluent, emissions and the use of resources, wherever possible and practicable and for the prevention of pollution when possible.
- * This policy shall be reviewed at least annually.
